

BAKED MAC AND CHEESE

Store refrigerated for 5 days or freeze for up to 2 weeks.

Bring mac and cheese to room temperature before baking; remove from the refrigerator for about 1 hour. Preheat the oven to 375 degrees. Bake mac and cheese with the cover on for 20 minutes. Take cover off, and bake for another 10 minutes. If desired, place underneath the broiler for a minute or two to caramelize the top. ENJOY!
