

Roasted Chicken

Store refrigerated for 3 days or freeze for up to 2 weeks.

Remove Chicken tray from the refrigerator about 1 hour before heating to bring to room temperature. Preheat the oven to 375 degrees. Remove the cover, and bake for 10-12 minutes. Check the internal temperature of the chicken; it should reach at least 175 degrees before serving. If it needs more time, return to the oven until the chicken is hot in the center. Remove from the oven and enjoy!
