

Baked Gemelli

Store refrigerated for 5 days or freeze for up to 2 weeks.

Bring gemelli to room temperature before baking; remove from the refrigerator for about 1 hour. Preheat the oven to 375 degrees. Bake pasta with the cover on for 40 minutes. Take cover off, and bake for another 15 mins. Gemelli should be hot in the center. If it needs more time, leave in the oven for 10-15 minutes more. If the cheese is too golden in color, return the cover on the pan for the last few minutes. Remove the gemelli from the oven. Let it rest at room temperature for 20 minutes before serving.
